NICOLÁS QUIROGA

Full Stack Developer (React, Node.js, TypeScript)
Buenos Aires, Argentina (Remote, UTC-3) | nquirogawebdev@gmail.com | linkedin.com/in/nquirogawebdev | github.com/NicolasQuirogaweb | portafolio-nquirogawebdev.vercel.app

PROFESSIONAL SUMMARY

Full Stack Developer with 4 years of experience designing, building, and deploying full stack web applications with React, Next.js, TypeScript, Node.js, Express, MongoDB, and PostgreSQL. Proven experience in OAuth and JWT authentication, REST API design, performance optimization, NoSQL and SQL database architecture, and production deployments using Docker, CI/CD, Render, Vercel, and AWS.

TECHNICAL SKILLS

Languages & Frameworks: TypeScript, JavaScript (ES6+), React, Next.js, Node.js, Express.js, HTML5, CSS3, Tailwind CSS
Databases: MongoDB, PostgreSQL, Redis (caching and cache invalidation)
Authentication & Security: Google OAuth 2.0, JWT (access/refresh token rotation), role-based access control (RBAC), rate limiting
APIs & Documentation: REST APIs, microservices architecture, Swagger/OpenAPI documentation, GraphQL
DevOps & Cloud: Docker, CI/CD, AWS, Render, Vercel, MongoDB Atlas, Upstash Redis, Backblaze B2
Testing & Quality: Vitest, schema validation with Zod, TypeScript strict mode
Tools: Git, GitHub, Bitbucket, Figma, KonvaJS, Postman
AI: Hands-on experience working with Claude and OpenCode
Methodologies: Agile/Scrum, clean architecture, scalable system design

PROFESSIONAL EXPERIENCE

Full Stack Developer (Freelance) — Personal and Client Projects
2024 — Present | Remote, Argentina

- Built Niv0Prod, a full stack music platform (React 18, Node.js, Express, MongoDB) with Google OAuth/JWT authentication and role-based access control, a full CRUD admin panel, and drag-and-drop uploads to Backblaze B2.
- Designed a Spotify-style UI with sequential playback and responsive grids, and set up Docker-based CI/CD on Render (backend) and Vercel (frontend), reducing manual deployments.
- Built a URL shortener REST API (TypeScript, Express, MongoDB) with JWT and access/refresh token rotation, achieving Redis-cached redirects with sub-100 ms latency.
- Implemented click analytics with geolocation and day/week/month grouping, automatic expiration via Redis TTL, and rate limiting on auth endpoints (Redis + Upstash), documented with Swagger/OpenAPI.
- Built Riderlab, a real-time graphic editor (React, KonvaJS, TypeScript) for designing stage plots, used by live sound teams, featuring multi-select, drag/resize, grid snapping, and synchronized undo/redo.
- Developed canvas export to PDF/PNG with an auto-generated technical rider table, using modular custom hooks (useItemEventHandlers, useCanvasSelection, useMultiDrag).
- Provided freelance e-commerce setup consulting (Tienda Nube) for clients in the Argentine market: requirements gathering, quoting, and expectation management.

FEATURED PROJECTS

Riderlab *(React, Next.js, TypeScript, KonvaJS)* — Real-time stage plot editor for live sound teams, with PDF export and responsive scaling.

Niv0Prod *(React, Node.js, Express, MongoDB, Backblaze B2)* — Full stack music platform with Google OAuth, admin CRUD, and a Spotify-style player.

URL Shortener API *(TypeScript, Express, Redis, MongoDB, Docker, Swagger)* — REST API with JWT, geolocation analytics, Redis caching, and Swagger documentation, deployed on Render + MongoDB Atlas + Upstash.

EDUCATION

Full Stack Web Development Diploma
Universidad Tecnológica Nacional (UTN) — Argentina

LANGUAGES

Spanish: Native | **English:** Professional working proficiency

AVAILABILITY

Open to freelance and full-time opportunities, remote, available immediately.
