NICOLÁS QUIROGA

Full Stack Developer (React, Node.js, TypeScript)
Buenos Aires, Argentina (Remote, UTC-3) | nquirogawebdev@gmail.com | linkedin.com/in/nquirogawebdev | github.com/NicolasQuirogaweb | portafolio-nquirogawebdev.vercel.app

PROFESSIONAL SUMMARY

Full Stack Developer with 4 years of experience designing, building, and deploying full stack web applications using React, Next.js, TypeScript, Node.js, Express, MongoDB, and PostgreSQL. Proven experience with OAuth and JWT authentication, REST API design, performance optimization with Redis (sub-100ms redirect latency), NoSQL and SQL database architecture, and production deployment using Docker, CI/CD, Render, Vercel, and AWS. Additional background in live sound production, applied to building technical tools for live audio teams. Available immediately for remote or hybrid roles, freelance or full-time.

TECHNICAL SKILLS

Languages & Frameworks: TypeScript, JavaScript (ES6+), React, Next.js, Node.js, Express.js, HTML5, CSS3, Tailwind CSS

Databases: MongoDB, PostgreSQL, Redis (caching and cache invalidation)

Authentication & Security: Google OAuth 2.0, JWT (access/refresh token rotation), role-based access control (RBAC), rate limiting

APIs & Documentation: REST API design, microservices architecture, Swagger/OpenAPI documentation, GraphQL

DevOps & Cloud: Docker, CI/CD, AWS, Render, Vercel, MongoDB Atlas, Upstash Redis, Backblaze B2

Testing & Code Quality: Vitest, schema validation with Zod, strict-mode TypeScript

Tools: Git, GitHub, Bitbucket, Figma, KonvaJS, Postman

Methodologies: Agile/Scrum development, clean architecture, scalable system design

PROFESSIONAL EXPERIENCE

Full Stack Developer (Freelance) — Independent & Client Projects

2024 — Present | *Remote, Argentina*

- Built Niv0Prod, a full stack music platform (React 18, Node.js, Express, MongoDB) with Google OAuth/JWT authentication, role-based access control, an admin panel with full CRUD, and drag-and-drop uploads to Backblaze B2.
- Designed a Spotify-style UI with sequential playback and responsive grids, and deployed a CI/CD pipeline with Docker on Render (backend) and Vercel (frontend), reducing manual deployment effort.
- Built a URL Shortener REST API (TypeScript, Express, MongoDB) with JWT access/refresh token rotation, achieving Redis-cached redirects with sub-100ms latency.
- Implemented click analytics with geolocation and day/week/month grouping, automatic Redis TTL expiration, and rate limiting on auth endpoints (Redis + Upstash) with Swagger/OpenAPI documentation.
- Developed Riderlab, a real-time graphic editor (React, KonvaJS, TypeScript) for stage plot design used by live sound teams, with multi-select, drag/resize, grid-snapping, and synchronized undo/redo.
- Built canvas-to-PDF/PNG export with auto-generated technical rider tables, using modular custom hooks (useItemEventHandlers, useCanvasSelection, useMultiDrag).
- Provided freelance e-commerce configuration consulting (Tienda Nube) for clients in the Argentine market: requirements gathering, quoting, and client expectation management.

FEATURED PROJECTS

Riderlab *(React, Next.js, TypeScript, KonvaJS, PostgreSQL)* — Real-time stage plot editor for live sound production teams, with PDF export and responsive scaling.

Niv0Prod *(React, Node.js, Express, MongoDB, Backblaze B2)* — Full stack music platform with Google OAuth, admin CRUD, and a Spotify-style audio player.

URL Shortener API *(TypeScript, Express, Redis, MongoDB, Docker, Swagger)* — REST API with JWT auth, geolocation-based analytics, Redis caching, and Swagger docs, deployed on Render + MongoDB Atlas + Upstash.

EDUCATION

Diploma in Full Stack Web Development
Universidad Tecnológica Nacional (UTN) — Argentina

AVAILABILITY

Open to freelance and full-time opportunities, remote, available immediately.
