ABOUT

Full Stack Developer with 4 years building web products at the intersection of ambitious design and solid engineering. Proficient in React, Next.js, TypeScript, Node.js, PostgreSQL and MongoDB. Experience shipping production-grade apps with clean architecture, CI/CD pipelines, and cloud deployments.

React Next.js TypeScript JavaScript Tailwind Node.js MongoDB PostgreSQL GraphQL Docker AWS Git Figma PHP Bitbucket

EXPERIENCE

Frontend & Backend Engineer · Niv0Prod — 2024 — Present · Freelance

·Full-stack music production platform (beats, samples, loops) with React 18 + Node.js/Express + MongoDB.
·Google OAuth auth, JWT with role-based access (user/admin), and protected route guards.
·Admin panel with full CRUD, drag-and-drop file uploads to Backblaze B2 cloud storage.
·Spotify-style UI with sequential audio playback, cover overlays, and responsive grids.
·Docker + Render (backend) / Vercel (frontend) CI/CD deployment pipeline.

Frontend Engineer · Riderlab — 2025 — Present

·Real-time graphic editor on KonvaJS for stage design used by live sound engineers.
·Multi-select, drag/move, resize, grid-snapping, undo/redo history across canvas and tree panel.
·Canvas-to-PDF/PNG export with auto-generated technical rider table and editable notes.
·Modular custom hooks (useItemEventHandlers, useCanvasSelection, useMultiDrag) keeping components lean.
·Responsive scaling for mobile, tablet, and desktop with clipboard shortcuts.

Backend Engineer · URL Shortener API — 2025 — Present

·REST API with JWT auth (access/refresh tokens), custom slugs, and Redis-cached redirects (<100ms).
·Click analytics with geolocation, grouping by day/week/month, soft delete and TTL expiration.
·Rate limiting on auth endpoints (Redis + Upstash), Google OAuth, Swagger docs.
·Deployed on Render with MongoDB Atlas + Redis (Upstash).

PROJECTS

Riderlab Next.js TypeScript KonvaJS PostgreSQL

Web app for designing stage rider sheets with real-time canvas editor and PDF export. Used by live sound production teams.

Niv0Prod React Node.js MongoDB Backblaze B2

Full-stack music platform for streaming/downloading beats and samples. Google OAuth, admin CRUD, Spotify-style player.

URL Shortener API TypeScript Express Redis MongoDB

URL shortening API with auth, analytics with geolocation, Redis caching and Swagger documentation.
